Locking Key Cabinet

### Overview

The stylish and innovative design makes this key cabinet suitable for use in every home or office interior.

The electronic locking key cabinet has a resettable combination (19500 possible combinations) and lockout feature. Audio signals indicate if code was entered correctly. Low battery indicator (batteries not included). Code remains in memory after battery change.

Hidden compartment for long term storage of keys. Adjustable hooks for large sized key rings. Key tags with labels for easy identification are included. Also available without electronic lock.

### Operation

Enter the combination code on the keypad. The door will open if your code is correct.

### Applications

Residential market and small offices. Simple wall mounted key holding.

### Standard Features

- Modern, stylish design fits in every home or office interior
- Ideal for key management in the residential market or in small offices
- Hidden compartment for long term storage of keys or for backup keys
- Available with or without electronic lock
