Overview

Wi-Tek Power over Ethernet injectors provides different power and high-speed Ethernet data connection anywhere in your network infrastructure. Some of them come with industrial chipsets that can work at -40°C ~ 80°C harsh environments.

Wi-Tek PoE injectors are protected by a high-quality metal shell to ensure a long service life. They have passed a series of strict tests and provid you with reliable performance.

Features

Compatible with 802.3af/at/bt

Wi-Tek PoE injectors are compatible with both 802.3af/at/bt, and allow users to flexibly deploy standard and high-powered devices to transfer data and power simultaneously through one Ethernet cable for up to 100 meters.

Save your Cable and Time

Your IP camera and wireless AP will not be limited by the locations without a power outlet and no additional AC wiring. Most ost of all, it reduces installation time.

Supports Desktop or Wall Mount

These PoE injectors are suitable for use on a desktop or in a wall-mount installation and meet your different environments.

Easy to Install

Zero configuration, simply connect the injectors to an Ethernet Switch and to the IP-based PoE device to provide power and data for the network with a compact and lightweight design.
