Aer smoke

Cellular smoke alarm and air quality monitor

Enhance your product portfolio while generating recurring revenue with a versatile two-in-one smart smoke alarm and air quality monitor. Provide your customers with advanced safety features that bring peace of mind and offer convenient smart home capabilities for their comfort.
Produced in the EU

How it's built

- Always on & no wires, Wi-Fi, or Bluetooth connection needed
- Dual wavelength optical smoke detector
- Air quality monitoring
- Comfort temperature and humidity level observation
- Eradicated false alarms
- Patented sensor and algorithm
- Integrated cellular and data connectivity
- Certification: EN 14604:2005/AC:2008 and EN 50291-1:2018

How it works

- Device management via a dedicated dashboard and app
- iOS and Android apps with a white-label option
- Fast, secure, and reliable cloud infrastructure (AWS)
- Multi-tenant functionality
- Versatile API with detailed documentation
- Multi-level notification system – push notifications, texts, and calls
- Option to redirect notifications to e.g. fire department or call center
- Continuous air quality observation & access to historical data
- Fully GDPR compliant, data stored in the EU
- Enterprise level support
