Smart Keybox 3

The igloohome Smart Keybox 3 is a smart lock box that stores keys, access cards, car key fobs and more for easy retrieval. Designed for vacation rental hosts, home, property and business owners, it is spacious and jam-packed with features for your convenience.
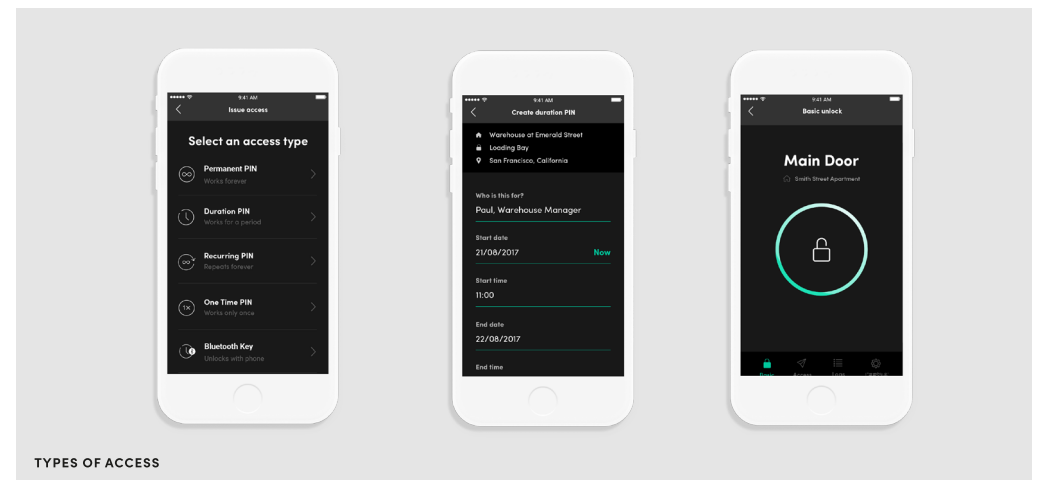

USD 189

MOBILE APP ENABLED

Mobile app-enabled

The Smart Keybox 3 works together with the igloohome app to allow home or property owners to grant access remotely via PIN codes and Bluetooth keys. Choose to grant permanent, duration, one-time or recurring access for convenience and security. These can be customised for each visitor, ensuring your property is secure before and after the visitor leaves.

Activity logs* and battery status can also be monitored from the app, updated each time the lock is synced to the app via Bluetooth. The app is available for both iOS & Android devices.
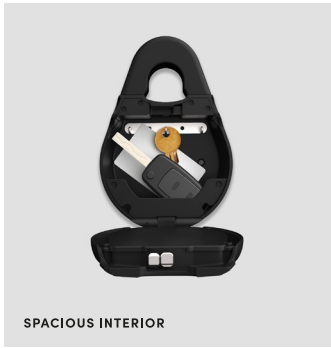

*Bluetooth key activity logs are updated in real-time.

TYPES OF ACCESS

Works offline

Even with its remote capabilities, the Keybox 3 works offline for enhanced reliability and security. There's no worries of WiFi hacking or network instability.

It features the innovative algoPIN™ technology which makes our security products suitable for properties with weak or no WiFi connections at all. There's no need to download an additional app to receive PIN code access.

SPACIOUS INTERIOR

INTERCHANGEABLE SHACKLES

Spacious Interior

Compared to other Bluetooth lock boxes, the Smart Keybox 3 comes with much more interior storage space to hold house keys, access and transport cards, and even car key fobs for safe and easy handovers. It can also be used for passing of small items like cash or to facilitate vehicle sharing services.

Versatile and hassle-free

With two interchangeable shackle sizes, the Keybox is optimised for shackling on door knobs, handles and even fences. Alternatively, you can also mount it on walls or firm structures.

Keypad security lockout

Keypad is disabled after several incorrect PIN code attempts to ensure your property is always secure.

Auto Relock

The Keybox automatically relocks once it is completely shut to give you a greater peace of mind.

Intuitive keypad interface

The reactive backlit keypad is designed for optimal sensitivity and visibility in both day and night setting. Tri-coloured LED indicator alerts users of the functional status of the Keybox.

Masking Security Code

Heighten security by entering random digits before your actual PIN code to throw off onlookers.

Relock reminder alert

The reminder alerts users when they forget to close the Keybox.

Emergency jumpstart

Easily jumpstart the Keybox with a USB-C cable and a power bank as an emergency measure if batteries are drained.

Instant access request

Approve and send Bluetooth keys to the right people instantly when they request for access by scanning the unique QR code.

Low Battery Alert

An intuitive audio and LED visual alert will prompt you to change the batteries before they run out.
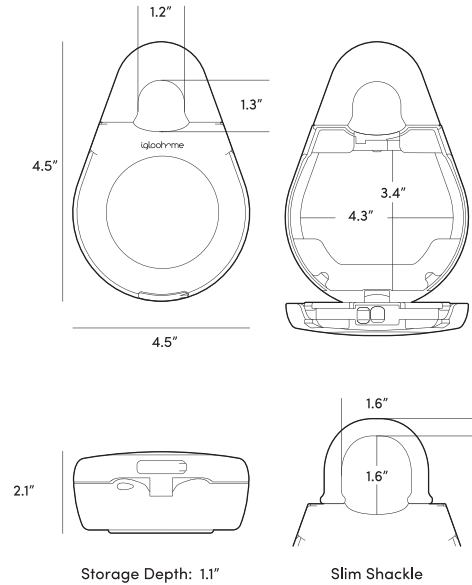

Airbnb integration

Airbnb hosts can also integrate their calendars with the Smart Keybox 3 for automatic generation of PIN codes for guests, with no extra fees.

API & SDK integration

We provide APIs and SDKs for seamless integration across several platforms.
