MODES OF ACCESS

PIN Codes

Bluetooth Keys

Bigger is better

Compared to other Bluetooth lock boxes, the Smart Keybox 3 comes with much more interior storage space to hold house keys, access and transport cards, and even car key fobs for safe and easy handovers.

Versatility for your convenience

With two interchangeable shackle sizes, the Keybox is optimised for shackling on door knobs, handles and even fences. Alternatively, you can also mount it on walls or firm structures.

Your 24/7 reception

Let guests in any time of the day, even when you're miles away! The igloohome mobile app lets you manage access in the palm of your hands.

There's no need for users to download an app to receive PIN codes, or for you to be near the Keybox to grant access. You can simply send Bluetooth keys to track activity logs in real-time.*

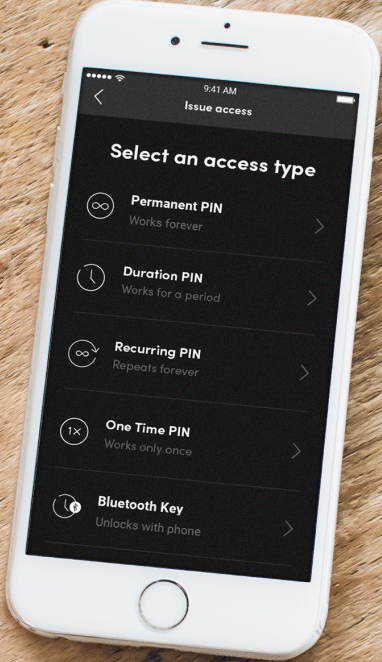

**Note: PIN code activity logs are updated when you sync the lock via Bluetooth.*

Syncs with Airbnb

Easily connect your Airbnb account via the igloohome app to automatically create and send PIN codes for each guest according to your listings.
