Easy setting

Replaceable battery

Biometric Padlock - Outdoor Use

With Masterlock's biometric padlock, you no longer need a key or a combination! This padlock is a marvel of technology. By recording up to 10 fingerprints, access can be shared with the people you select.

The Master Lock biometric padlock is designed to guarantee **an optimal security level** while being perfectly suited for outdoor use. Its zinc casing, a boron alloy shackle and double-locking closing system all guarantee a better resistance to attempted burglary. The padlock is covered with a thermoplastic elastomer as a protection against the elements.
