

Evac+Power 1000H

Powerful. Efficient. Effortless.

**When every second matters, choose the
Evac+Chair that redefines evacuation.**

Meet the Evac+Power 1000H — the next generation in powered evacuation. With its 36V lithium-ion battery, it effortlessly glides up and down stairs at the touch of a button, giving operators maximum control with minimal effort — fast, smooth, and reliable.

**Ascent & Descent Evacuation**

Powered performance both up and down stairs.

**270kg Payload Capacity**

The world's strongest evacuation chair.

**One to Two-Person Operation**

Flexible, efficient and adaptable to the situation.

**No Heavy Lifting Required**

Protects your team and prevents injuries.

Why Choose the Evac+Power 1000H?

Evac+Power 1000H

Powerful. Efficient. Effortless.

Boasting an unmatched 270 kg payload – the highest in the world – the Evac+Power 1000H is built for the most demanding evacuations with absolute reliability.

Lightweight, quick to deploy, and engineered for efficiency, it ensures the safe, stress-free evacuation of mobility-impaired individuals – no matter the challenge.

The Benefits of an Evac+Chair

Compliance guaranteed. Safety secured. Evacuation simplified.

With the Evac+Power 1000H, no one is left behind. Staff, visitors, and customers can rely on a fast, safe evacuation every time – because safety is non-negotiable.

Compliance

Ensures you meet fire safety and accessibility regulations.

Inclusivity

Provides equal access to emergency evacuation for everyone.

Reassurance

Gives staff, visitors, and customers confidence that a safe evacuation plan is in place.
